# Our History

Tradition and innovation at the service of quality

A history of over **30 years of experience in the tissue sector.**

A constant technological research and a continuous commitment to a model of sustainable development.

A process with vertical integration from the paper mill to the transformation lines able to offer specific solutions for all environments.

A quality policy that allows the selection of certified materials that comply with high quality standards.

A dedicated attention to customer satisfaction.

**Paperdi** is the tissue of quality, the synthesis of experience and innovation.

A company that makes its values the real strength and synthesizes them in every choice.

**Reliability  
and Solidity**

**Balance**

**Responsible  
Innovation**

**Transparency  
and Ethics**

# Our Key Numbers

Performance and numbers

We produce tissue paper articles, pursuing a development model capable of reconciling business growth with customer satisfaction, creation of economic value and protection of the environment

Our mission has always been to offer the right paper for every use.

# Sustainable projects

Research and development

# 1

## **ALL IN PAPER**

Our primary objective has always been the protection of the environment and the low environmental impact of Paperdi products finds maximum expression in the ALL IN PAPER project. An important research and development project that sees as its protagonist the conversion of all the packaging of our Z-folded towels from plastic to paper to obtain a zero-waste product. The first important little step for a future ALL IN PAPER.

# 2

## **NO TOUCH - NO WASTE**

**Soavex professional:** a new project that summarizes the attention to the environment and to our customers.

A dispensing system that guarantees the reduction of waste and ensures the total hygiene of the service to the consumer.

# 3

## **LOW ENVIRONMENTAL IMPACT**

Our products are designed to optimize the environmental impact even in the handling and transport of goods:

the "LOW ENVIRONMENTAL IMPACT" attests to the commitment made by Paperdi in the creation of increasingly compact packaging, thanks to innovative solutions in terms of packaging and palletizing.

# Certifications

Certified commitment to a sustainable future

## ISO 9001

Is a voluntary international standard that defines the requirements of a quality management system, in order to conduct business processes following codified work procedures to ensure the constancy of production and management processes and to contribute to their continuous improvement, all oriented to ensure customer satisfaction.

## ISO 14001

Is a voluntary international standard aimed at certifying the Environmental Management System of organizations, which are committed to evaluating and improving their environmental efficiency in terms of continuous improvement of performance in a consistent, effective and sustainable way, to carry out a careful control of the environmental impacts of their activities, to involve their employees and monitor their performance ensuring compliance with their environmental policy.

## ISO 45001

Is the international ISO standard for occupational health and safety management systems (SGSSL). The 45001 has the ultimate goal of helping companies provide a safe and healthy work environment for their employees and all those who visit the workplace. This goal can be achieved by controlling the factors that could potentially cause injuries, illnesses and even death and requires organizations to continuously improve, providing all stakeholders with the guarantee of compliance with the specified safety policies.

## ISO 50001

ISO 50001 is the international standard dedicated to energy management systems. The certification attests to the company's commitment to monitoring, optimizing, and reducing energy consumption on a continuous basis. The goal is to improve energy performance, decrease environmental impact, and increase process efficiency through a structured and sustainable approach.

## EMAS

The EMAS certification represents the official recognition of the achievement of excellent performances. The objective of EMAS is the continuous improvement of environmental performance implemented voluntarily and independently of the legal limits, which are in any case taken as minimum reference parameters.

## FSC

The FSC® mark identifies products containing wood from forests managed correctly and responsibly according to strict environmental, social and economic standards. The FSC® ensures that forest of origin has been independently controlled and evaluated in accordance with these standards (principles and criteria of good forest management), established and approved by the Forest Stewardship Council®

## ECOLABEL

EU Ecolabel is the ecological certification, on a voluntary basis, which certifies that the products, during their entire life cycle, comply with strict environmental protection criteria common to all the countries of the European Union.

## BRC (GLOBAL STANDARD FOR FOOD SAFETY)

The BRC Global Standard for Food Safety was created in 1998 to guarantee that branded products are obtained according to well-defined quality standards and in compliance with minimum requirements. The requirements of the standard relate to the quality management system, HACCP system and relevant prerequisite programs, including GMP (Good Manufacturing Practice), GLP (Good Laboratory Practice) and GHP (Good Hygiene Practice) requirements. Certification to the global standard includes the evaluation of a company's premises, operating systems and procedures. Maintaining certification requires adherence to the latest version of the standard, which is reviewed regularly.

## GO

Paperdi Srl annually certifies at least 30% of the total energy consumption of its industrial plants through Guarantees of Origin, partly from self-produced energy from renewable sources within the company and partly from green energy purchased from third-party sources.

# Our Commercial Range

Quality and softness for every need

## PROFESSIONAL LINE

PRODUCTS DEDICATED TO THE PROFESSIONAL SECTOR

Fast Dissolution

NO-TOUCH DISPENSING SYSTEM DEDICATED TO THE PROFESSIONAL SECTOR

## BRICO LINE

PRODUCTS DEDICATED TO THE DOMESTIC/PROFESSIONAL SECTOR, DIY, AND GARDENING

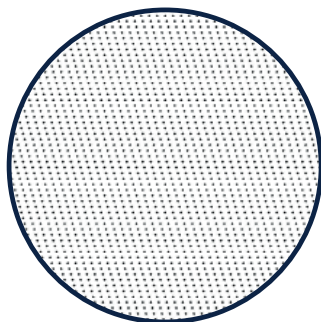

## CONSUMER LINE

PRODUCTS DEDICATED TO THE DOMESTIC SECTOR

# Our Embossings

Design and functionality in every detail

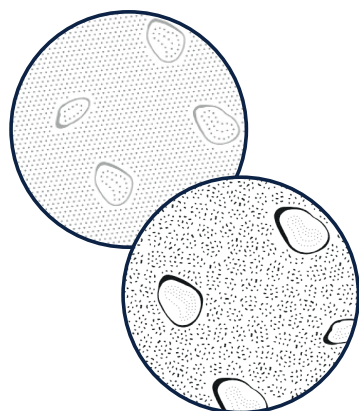

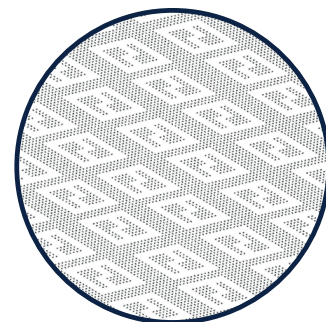

## MICRO

It is the standard for the professional sector. A set of points without particular shapes: a product characterized by the absence of decoration.

## LOZENGE

For rolls and folded products, a characterization is added to the simplicity of the micro-embossing that enhances the quality of the product.

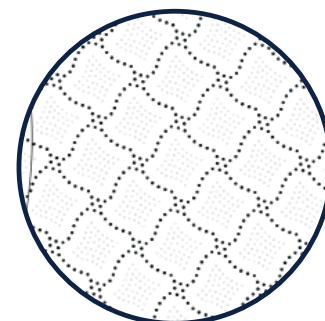

## ZEN TOILET AND ZEN TOWEL

A distinctive texture, designed and studied to obtain maximum volume, softness, and absorbency.

## NET

Designed and studied to make the high quality and softness of the product felt from the very first touch.

paperdi®  
il tissue di qualità

**OUR RANGE**

# NEW LINE by Paperdi

A complete range of paper solutions designed to ensure **maximum hygiene, practical operation, and comfort** in professional settings where safety and quality make the difference. Thanks to the selection of premium raw materials and the processing technology used, **BAMBÙ rolls and towels** guarantee:

**SUPERIOR HYGIENE. PROFESSIONAL STRENGTH. HIGH ABSORBENCY.**

## The **PERFORMANCE** of a *fabric* in a **SINGLE-USE** format

### HYGIENE

Superior hygiene  
ompared to tissue towels.  
**ZERO FUNGI  
AND BACTERIA**

### SOFTNESS

Delicate on the  
skin

### PRACTICALITY

Thanks to individually folded  
disposable towels and optimized roll  
tear size, you use only what you need,  
reducing waste and consumption.

### ABSORBENCY

Dries quickly  
without residue

### VERSATILITY

Ideal for beauty centers and  
spas, hair salons, healthcare  
facilities, grooming services,  
and the pet care sector.

## COMPLETE SOLUTION FOR THE PROFESSIONAL

By combining **single use hand- towels** and **Bambù wiper with hygienic roll**, we offer a coordinated solution, ideal for those who want:

- Consistency of supply
- Cost optimization
- High hygiene standards
- Increased operational efficiency: a single supplier
- A single quality standard: less complexity, optimization of reordering time.

COD. LI8M050/6  
**BAMBÙ HYGIENE ROLL**  
EAN 8013824805036

PURE CELLULOSE

cm  
59,6 X 37

A territorial networking project which was born with the aim of producing raw materials at its own paper factories from the processing waste of the box factories with which there are partnership relationships, located mostly in Campania.

## Keyword **SUSTAINABILITY**

A totally **PLASTIC FREE** project: from the box to scotch until the packaging of the package: No to undifferentiated waste.

**ECOLABEL AND FSC CERTIFIED SUSTAINABILITY:** from the certification of the product to the raw material up to the packaging.

**SUPER COMPACT PACKAGING** for a choice with low environmental impact even during transport and handling.

**HAVANA PAPER:** raw material made from packaging recycling.

## **OUR GOALS**

Promote a circular economy of the supply chain through the reuse of by-products deriving from "pre-consumption" and "post-production".

Create a complete range of "ecological" products for hygienic uses with low environmental impact.

Consolidate partnership relationships with its paper packaging suppliers by promoting common awareness of environmental protection.

Reduce the environmental impact as a result of supply logistics within a predominantly local territorial area.

eco

GREEN  
plus

So green, **PLUS white**

The innovative EcoGreen Plus line combines the high performance of pure cellulose with the sustainability of recycled paper.

Whiteness degree, softness and resistance are the characteristics of the line produced 100% with **recycled raw materials** coming for more than 50% from pre-internal consumption and for the remaining part from post-reconditioned consumption. Thanks to a **KMO circular supply** model based on the end of waste and the increase in the percentage **of material coming**

**from internal pre-consumption**, the EcoGreen Plus range optimizes the logistic processes of the raw material, with a consequent impact on transport-related CO2 emissions. In addition, the PLUS line maintains a **high uniformity** despite the variability of the raw material thanks to a careful and scrupulous selection of processing materials.

## Innovative Features

**Territorial networking strengthening**

**Activation of a circular economy model at KMO**

**High degree of whiteness obtained without bleaching agents or dyes**

**Optimization of logistics processes through proximity, resulting in impact on transport-related CO2 emissions**

**Use of by-products from pre-consumption**

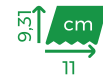

**Exploitation of post-consumer products**
